

Dr. Keith McNally

Keynote Speaker & Trainer

University Professor

Member: National Society of Leadership and Success

Leadership | STEM | Entrepreneur

On a mission to help you explore STEM careers with leadership, power, and passion!

Project-Based Learning in a Digital World

- Move beyond the project and explore the Project-Based Learning (PBL) environment for your classroom experience. Know how to use PBL to enhance student achievement and propel them into STEM careers of the future!

Keynotes, Workshops, and Breakout Sessions

STEM LEADERSHIP AND SUCCESS

Explore how the core pillars of leadership open your thoughts to new ideas, creativity, and empowerment. Achieve success by breaking through boundaries in mind, behavior, and emotional insight.

TEAMWORK IS MORE THAN A WORD, IT'S A DECISION

Looking at team-work from the need to succeed rather than a need to be seen. Creativity, collaboration, and the cultivation of a work environment that emphasizes synergy brings people together.

STEM: YOUR FUTURE IS NOW

Learning where you fit into the world of STEM may seem overwhelming, but there is a pathway for you to make the connection between now and your future. Build the intellectual and behavioral patterns that get you to your goals.

DESIGN THINKING – THINK ON PURPOSE

Think on Purpose brings you to problem solutions faster and more efficiently with people-focused answers to the worlds more difficult problems.

Testimonials

“Powerful and insightful . . . a motivational force in the classroom.”

“My passion for IT began with Doc. Now I’m in charge of IT projects.”

“Demonstrated an interest in my success, and that was years ago. I appreciated the work he does for his students.”

What is Digital Vision?

Digital Vision LLC is a STEM company designed to bring youth into the 21st century with the core leadership, academic, and intellectual skills to succeed as a STEM professional. Learn how your decisions, creativity, and passions help you decide which STEM career path is right for you.

Move into the world of Information Technology, Space Exploration, Robot Design, and Software Development. Learn to cross the bridge from where you are now into the career that fits you – with power, passion, and prowess.

Dr. McNally empowers STEM professionals of the next generation through leadership development and training based on his core pillars of leadership. Through workshops and breakout sessions, participants engage in discussion and explore the power of personal insight and decision-making that create the foundations of tomorrow’s technologies. By applying the skills in mentorship, leadership, and passionate growth, young minds experience life-changing rewards that bridge them to careers in Information Technology, Software Development, and Space Exploration. You will learn powerful insights into the world of entrepreneurship, branding, and business ownership as you consider the plethora of choices available to you as a STEM professional. STEM - it’s the world of possibilities.
